Max Ball

Full Stack Software Developer

Experienced Full Stack Developer looking to continue and expand upon the professional skills already developed. A dedicated problem-solver and advocate of honest communication who has been regularly promoted to positions of increased responsibility through consistent behavior and reputable work ethic.

Experience

July 2022 - October 2022

Boise CodeWorks | 8455 Westpark St, Boise, ID 83704

Full Stack Software Developer Student

- Completed over 500 hours of developing applications using industry-standard practices.
- Developed, tested, and debugged +10 deployable applications that demonstrate proper understanding of multiple languages and development methodologies including agile Scrum.
- Exhibited an in-depth understanding when introduced to new and complex concepts by consistent coding conventions and practices.

2020 - 2022

Maravia Corporation | 602 E 45th St, Boise, ID 83714

Project Manager/Shipping Manager

- Helped facilitate the transition of the company's ERP to Oracle NetSuite by creating and following developed procedures.
- Acted as the intermediary between the company and consultants through open and consistent communication.
- Identified shipping issues and collaborated with parcel and freight companies to create work standards that increased efficiency and productivity.
- Led a shipping team and designed a positive work environment that focused on employee satisfaction.

Applications

Magic Medley

github.com/Miles-Collins/Magic-Medley

- Collaborated with a team of developers to build and deploy a full application in two weeks where users can search for Magic: The Gathering cards, build digital decks, and interact with other users and their decks.
- Operated with the Agile Scrum procedures to manage and use time constraints to our benefit.
- Implemented persistent storage using the CRUD methods with multiple RESTful APIs including Google Maps, MongoDB and Scryfall.
- Applied front end build and design through comprehensive knowledge of Vue, HTML and CSS.

Allspice

github.com/Max-Ball/Allspice

- Developed A full-stack responsive application that allows users to view, create, and favorite recipes. Users also have the ability to add ingredients and instructions to the recipes they create.
- Showed an understanding of relational databases using MySQL that feature one-to-many and many-to-many relationships.
- Demonstrated back-end proficiency using C#.
